EMMANUEL OLELE

Cardiff, UK | +447308468383 | olele.max@yahoo.com | github.com/oleleemma88/IAM-Lab-Portfolio

PROFESSIONAL SUMMARY

Identity & Access Management professional with 8 weeks of hands-on experience in enterprise IAM platforms.

Skilled in user provisioning, single sign-on configuration, multi-factor authentication, and access governance.

Proven ability to learn quickly and implement technical solutions. Ready to contribute to access management

and identity workflows in a junior or entry-level role.

TECHNICAL SKILLS

Identity & Access Management (IAM) | Azure Active Directory / Microsoft Entra ID | Okta Platform

Active Directory (AD) | SAML 2.0 & OpenID Connect (OIDC) | Multi-Factor Authentication (MFA)

Conditional Access Policies | User Provisioning & Lifecycle Management | SCIM Protocol

Group Policy (GPO) | Access Reviews & Governance | Okta Verify | Microsoft Authenticator

Windows Server | Microsoft Learn (certified completion)

HANDS-ON LAB EXPERIENCE

Active Directory Fundamentals (Week 1-2)

Designed and deployed AD domain environment with 10+ users across 3 organizational units (Sales, IT, Finance)

Configured NTFS file permissions, group policies, and password complexity requirements

Implemented user provisioning and deprovisioning workflows

Platform: Windows Server 2022, Active Directory Users & Computers

Azure AD & Cloud Identity (Week 3-4)

Provisioned 10 users and created security groups in Azure AD tenant

Implemented Multi-Factor Authentication (MFA) using Microsoft Authenticator and SMS

Designed and deployed 3 Conditional Access policies: Require MFA for all users, Block legacy authentication,

Require MFA for risky sign-ins

Created OAuth 2.0 app registration with admin consent and permissions scoping

Platform: Azure AD / Microsoft Entra ID, Azure free tier

Okta Platform & SSO (Week 5-6)

Configured SAML 2.0 single sign-on (SSO) integrations with test applications

Implemented MFA policy requiring Okta Verify authentications for all users

Enabled SCIM provisioning to automatically create/update users in downstream applications

Performed quarterly access reviews and deprovisioned inactive users

Simulated complete user onboarding workflow: user creation, group assignment, app provisioning SSO, MFA

Platform: Okta Developer Sandbox (100 user environment)

CERTIFICATIONS & TRAINING

Microsoft Active Directory Fundamentals Completed (Learn.microsoft.com)

Microsoft Azure AD Administration Completed (Learn.microsoft.com)

Conditional Access in Azure AD Completed (Learn.microsoft.com)

Okta Developer Sandbox Hands-on experience (2 weeks intensive)

In progress: Azure Administrator (AZ-104)

PROJECTS & PORTFOLIO

IAM Lab Portfolio (8-week hands-on training)

Built end-to-end identity management environments demonstrating user provisioning, SSO, MFA, and access governance.

Complete documentation, screenshots, and lab report available on GitHub: github.com/oleleemma88

EDUCATION

MSc Project Management

Cardiff Metropolitan University 2022

ADDITIONAL INFORMATION

Keen interest in cloud identity, Zero Trust security, and password less authentication

Quick learner with strong attention to detail in access management

Comfortable with technical documentation and explaining security concepts
